WHERE CONNECTION BEGINS

Product Intro and Purpose

Wavelength Intro

Where Connection Begins

Created by: Avery Boyer • Noah O'Donnell • Luke Wickline • Sam Garrett • Andrew Horton • Charles Thompkins

THE PROBLEM

Problem Statement: Attending a new church is intimidating for college students due to feeling like an outsider, leading to anxiety in church and withdrawal from attending.

Rationale: Our fieldnotes across a variety of student-focused churches show that Sunday church services are typically effective. However, our fieldnotes have revealed consistent feelings of intimidation and difficulty with integration into the community for church goers without established relationships.

> ***"Before I was going to church consistently, I would not go because I didn't know anybody and I was scared to go alone." - Fieldnotes Interviewee***

OUR PURPOSE

We created Wavelength to make connecting feel natural and low-pressure. It's designed to gently help newcomers find their place and feel at home in our church community.

The Context	The Intention	The Result
College-aged newcomers attending large student-focused church services.	Gives guests a way to approach a stranger through a system that feels like play, not performance.	Makes joining a church community feel more comfortable by helping people build fun, familiar connections that encourage them to return.

Set Up Instructions

Set Up Instructions

WHO DOES WHAT

Facilitator	Volunteers
• Syncs wristbands • Assigns color groups via App • Tests LED on each wristband • Loads prompts on room screen	• Clears floor space for Molecules • Sets up chairs and tables for Biography • Positions wristband basket at welcome desk • Does final walkthrough of space

STEP-BY-STEP

1 **Check the Wristbands** Facilitator

- Open kit and thoroughly read Facilitator Playbook
- Confirm all wristbands are functioning properly

2 **Prepare the room** Volunteer

- Clear the center floor area. There should be no chairs or obstacles for Community Molecules
- Set up one table per color group (3-10 tables depending on group size) around the perimeter of the room for Collective Biography
- Place one pen and one sheet of paper at each table
- Position the wristband basket at the welcome desk by the entrance

3 **Sync and Assign color groups** Facilitator

- Open the Wavelength App
- Enter your facilitator code located on your Facilitator playbook cover page to Sync your group's wristbands to your app. You will now have facilitator access.
- Enter expected guest count and allow the system to calculate group sizes
- Assign color groups and confirm group sizes.
- Sync all wristbands wirelessly.

4 **Load room screen and prompts** **Facilitator**

- Connect laptop or device to the room display
- Open your own prompt deck for molecules and navigate to the first conversation prompt
- Confirm the screen is visible from all areas of the room

5 **Final walkthrough** **Both**

- Facilitator: confirm app is functional and all wristbands are glowing
- Volunteer: confirm floor is clear, tables are set, basket is at the welcome center
- Both: walk the full event path.
- Confirm no setup items remain.

Ready to open the doors when:

✓ *All wristbands are charged and synced*
✓ *Floor is clear and tables are set with paper and pens*
✓ *Room screen is displaying the first prompt*
✓ *Wristband basket is at the welcome center*
✓ *Facilitator has confirmed total working wristband count*

Product Features

Product Features

01 The Wristband

Interactive hardware worn by every guest at the event

The wristband is the anchor of the entire Wavelength experience. Every feature (the color groups, the game mechanics, the post-event connection), flows from the moment a guest puts it on. It is designed to feel effortless to wear and intuitive to use.

HARDWARE FEATURES

LED color display	Each wristband displays a changeable color. The color can be used to sort guests into groups or for interactive game participation.
Manual color override	If the facilitator allows, the individual wristband colors can be switched manually by guests with a button. The facilitator can also lock or switch wristband colors with the app.
App sync **Prototype: simulated**	Wristbands receive color assignments wirelessly from the app. This keeps all devices in sync across the room without requiring guests to interact with any settings.

CONNECTION FEATURES:

NameDrop **Prototype: simulated**	Allows users to instantly share contact information, sign up for small groups, or join church contact lists by tapping their RFID bracelet, automatically saving the connection in the app for easy access later.

wavelength

02 The Game Library

A growing set of structured experiences built for the wristband system

The games are the content layer of Wavelength. The wristband system is designed to support any number of games. This can include different formats, group sizes, energy levels, or community goals.

LAUNCH GAME SET

1	**Frequency**	Guests form groups from wristband colors and follow conversation prompts to begin community integration.
2	**Community Molecules**	Guests spread out and mingle to upbeat music until the facilitator instructs them to form molecule groups of a certain number. Participants use their wristbands to select color-coded responses to questions in real time.
3	**Collective Biography**	Guests remain in their last community molecules group and work together to create a biography of unanimous commonalities between all group members.

ADDING GAMES TO THE LIBRARY

Any structured activity that uses wristband color groups as its organizing unit can be added to the library. Future games might include:

- Shorter warm-up activities for smaller gatherings or repeat events
- Games designed for specific community goals such as cross-generational mixing, leadership identification, or team building
- Seasonal or themed variations on the existing three games
- Facilitator-designed custom games using the same wristband infrastructure

Event Kit Options

Event Kit Options

Wavelength is available in three package sizes designed to match the scale of your event. What scales between tiers is the number of wristbands, color groups, game options, and staff required to run a smooth event.

Small Group Kit - $____

20-30 guests

Perfect for smaller newcomer nights, small group launches, or pilot events

20
wristbands

What's included

- 20 wristbands
- App Access
- Facilitator guide (games + prompts)
- Full game library (Frequency, Community Molecules, Collective Biography)

Medium Group Kit - $____

30 – 50 guests

The standard Wavelength experience — designed for a typical newcomer mixer

50
wristbands

What's included

- 50 wristbands
- App Access
- Facilitator guide (games + prompts)
- Full game library (Frequency, Community Molecules, Collective Biography)

Large Group Kit - $____

51 – 100 guests

Built for high-attendance events, semester kickoffs, and large student gatherings

100
wristbands

What's included

- 100 wristbands
- App Access
- Facilitator guide (games + prompts)
- Full game library (Frequency, Community Molecules, Collective Biography)
- Recommended: add facilitator-designed games for large group energy management

	Small	Medium	Large
Guest capacity	20 - 30	31 – 50	51 – 100
Wristbands	20	50	100
Color groups	3 – 4	5 – 7	8 – 10
Games included	Full library	Full library	Full library
Price	[$]	[$$]	[$$$]

Event Schedule and Structure

Event Agenda

90-Minute Mixer

The Wavelength mixer is designed to run in 90 minutes from first arrival to final exit. The structure is fixed enough to be repeatable and flexible for different group sizes. One trained facilitator runs the event. Volunteers manage the door, help with setup, and assist with late arrivals.

Time	Agenda Item
During Event Preparation	**Required Event Registration** **Led by:** Church Staff Promote the Wavelength event while directing participants to register their attendance on the website and download the Wavelength app to get involved.
Pre-event 20 min	**Setup & wristband sync** **Led by:** Facilitator Facilitator syncs all wristbands to the app, assigns color groups based on expected attendance, and clears floor space for Community Molecules. Guests are not yet present.
5 min	**Guest arrival & wristband distribution** **Led by:** Volunteer at door Guests receive a wristband at the door and are led into the event room. ▸ *Late arrivals: the door volunteer stays at the entrance throughout the event. Any guest who arrives late receives a wristband and is quietly walked to their color group. No announcement, no disruption.*
5 min	**Facilitator welcome & Church Intro** **Led by:** Facilitator The facilitator introduces themselves and the church. **Take this time to explain the church's mission and emphasis on building**

	community. They introduce the app and guide the guests through the app sign-up process.
15 min	**Frequency** **Led by:** Facilitator + room screen Guests find a small group whose wristband matches their color. After the group is formed an icebreaker prompt pops up on the screen. After two minutes, wristbands change colors and users find new groups. Repeat 5 times.
15 min	**Community Molecules** **Led by:** Facilitator The floor is cleared. The facilitator calls group numbers and guests form groups of exactly that size each round. Five rounds total, structured to build energy: groups of 2, 4, 5, 3, 6. Participants use their wristbands to select color-coded responses to questions in real time. The last round will be the guests' group for the final game.
25 min	**Collective Biography** **Led by:** Facilitator Color groups sit together at tables. The one rule: every sentence in the biography must be unanimously true. If even one person says 'not me,' it doesn't go in the biography. Groups spend 13 minutes in discovery, 7 minutes writing a flowing paragraph, then each group reads their biography aloud one at a time. After all biographies are read, each member uses the NameDrop feature to connect with other people at their tables.
10-15 min	**Response Segment** **Led by:** Facilitator The facilitator acknowledges the fun experience of building community in the church. Transitions to response segment and discusses the purpose of intentional community for each individual in the church. **The response segment introduces a simple color-switch system where participants indicate their openness to connection: green for those seeking connection, yellow for those open to welcoming others, and blue for those who prefer to observe. The facilitator then directs interaction by guiding participants wearing yellow to connect with those wearing green, creating immediate and intentional social engagement.** Throughout this process, the

	facilitator actively reinforces roles, encourages introductions, and ensures no one leaves without a meaningful connection.
5 min	**Exit tap — Optional deeper connection** **Led by:** Facilitator During the response segment, guests who selected yellow can approach those who selected green and instantly exchange contact information by tapping their wristband to the other person's connection feature in the Wavelength app.

What the church receives after each event

- *A list of guests who registered with their name and contact info.*
- *A list of guests who indicated that they are seeking a follow-up from the church.*
- *A list of volunteers who attended the event.*

Game Ideas

Game Ideas

Games aren't entertainment. They're infrastructure. Structured play is how we solve the hardest social problem in a newcomer event: the moment someone walks in alone and doesn't know what to do next.

The games use the wristband to break social barriers and create low pressure and guided interaction.

WHY GAMES WORK HERE

For college students entering a new church, the barrier isn't theological; It's social. The question isn't whether they believe. It's whether they belong. There are a few reasons games help to reduce that anxiety and help form natural relationships:

Lower the Stakes: A game gives people permission to approach strangers without needing a reason.	**Build Shared History:** Even a quick 15-minute game becomes something people remember and connect over later.	**Natural Event Flow:** Games have a beginning, middle, and end. That flow gives the facilitator natural transition points to move the room.

HOW THE GAME SYSTEM WORKS

Every game in the Wavelength library is built around the same core unit: the wristband color group. The wristband assigns belonging before anyone has to earn it. From there, each game is designed to do a specific job in the event arc: warming the room, building energy, deepening connection, or closing with intention.

Games are sequenced deliberately. Each one is designed to hand off to the next, raising the stakes of connection incrementally so that guests arrive at the end of the event having gone from strangers to a group with a shared name, a shared story, and a way to stay in touch.

> ***The facilitator's role in the games***
> *You're not a game show host. You're a room reader. Your job is to watch energy levels, call transitions at the right moment, and make sure no one is standing alone. The wristband system handles the logistics. You handle the people.*

Frequency

FREQUENCY

Leads into ➜ Community Molecules

Group Size	Time	When	Setting
5 – 6 people	15 - 20 minutes	Start of Mixer	Open Room Format

WHY USE THIS GAME?

The hardest moment for a first-time visitor is walking into a room full of strangers and not knowing what to do next. Frequency solves that instantly by guiding them to their small group and creating low pressure interaction.

HOW COLORS ARE ASSIGNED

Before the mixer, the app assigns each wristband a color. Every color has the same amount of people assigned. Guests don't know their group ahead of time.

Red	Yellow	Green	Blue	Purple

Adjust the number of active colors based on how many guests are expected.

HOW TO PLAY

1 **Guests receive their wristband at the door**
The wristband is already glowing their assigned color. At this point they don't know what it means, but the facilitator will introduce the next steps.

2 **They mingle and look for their color match**
People start searching for their color matches and begin forming groups.

3 **The groups are confirmed**
Once members start to form their groups, the facilitator will help anyone who can't find a group and confirm the groups.

4 **The group gets a conversation prompt**
A prompt appears on the room screen. The group spends a few minutes on it.

5 **Groups stay loose until Molecules begins**
Once everyone has found their group, guests keep mingling freely. Frequency groups turn into familiar faces when Community Molecules starts.

SAMPLE CONVERSATION PROMPTS

Pick one before the event and display it on the room screen when groups form. These are intentionally light and easy to share.

- What's a food you could eat every single day and never get tired of?
- What's one place you've always wanted to visit but haven't made it to yet?
- What's a movie or show you've rewatched more than once, and would watch again?
- Are you a morning person or a night owl?
- What's the best event or gathering you've ever been to? What made it special?

Facilitator Tip — The Handoff to Molecules
When energy in the room starts to peak (usually 15–20 minutes in), that's your cue to transition into Community Molecules. Give a 2-minute heads-up and clear the floor.

Community Molecules

COMMUNITY MOLECULES

A Wristband-Powered Icebreaker for Welcoming New People

Group Size	Time	When	Setting
10 – 200+ people	10 – 15 minutes	After Wavelength	Open Space

WHY USE THIS GAME?

Community Molecules is designed for one thing: helping people who don't know anyone yet feel like they belong. Through movement, laughter, and play new visitors make real connections.

WHEN TO USE

Transition to this game when the room is gaining comfort and energy is building. Best when used as a follow up to Frequency.

Facilitator checklist:

- *All wristbands are charged and synced to the game system via Bluetooth*
- *Open floor space is cleared*
- *Practice calling out group numbers clearly and loudly*
- *Have a fun, low-key consequence ready for those caught alone (e.g., share your name + one fun fact)*

HOW TO PLAY

1 **Introduce the wristbands**
Tell everyone: "Your wristband connects you to every person in this room. Today it's going to help you find your people!"

2 **Everyone spreads out and mingles**
Play upbeat music. Participants walk freely, say hello, and get comfortable with the space.

3	**Call out: "Molecules of [number]!"** E.g., "Molecules of 4!" People will then quickly form groups of exactly that size.

4	**Repeat 4 – 6 rounds** Vary the numbers (2s, 5s, 3s...) and mix in wristband-color themed calls to keep energy high.

6	**Final round: find your color match** Tell everyone to find all others with the same wristband color. This becomes their small group for a 2-minute chat. A natural, pressure-free way to end with real connections made.

GAME VARIATIONS

Molecules of Home	Call a number. Each group must include people from different cities, states, or backgrounds.
Molecules of Kindness	Each group has 30 seconds to say one encouraging thing to every person in their group.
Molecules of Common Ground	After forming, groups have 60 seconds to find one thing everyone shares their favorite food, hobby, anything!
Solid / Liquid / Gas	"Solid" = stand still back-to-back, "Liquid" = walk slowly together, "Gas" = scatter freely.

Facilitator Tip

After the final round, invite people to stay with their color-match group as the next part of the gathering begins.

Collective Biography

COLLECTIVE BIOGRAPHY

A Wristband Small-Group Writing Game • Leads into ➢ Community Closing

Group Size	Time	When	Setting
4 – 6 people	20 – 25 minutes	After Molecules	Small group tables

WHY USE THIS GAME?

Collective Biography takes the connections your wristband just created and makes them real on paper. Groups slow down and ask a deceptively simple question: what is actually true about all of us? The search for unanimous statements reveals unexpected common ground and builds shared identity.

WHEN TO USE

Collective Biography is a bridge to deeper connection, once tension is reduced and some trust is built. The wristband color-match groups from the final round of Molecules become the biography groups automatically. Use it when:

- You want to deepen the connection the wristband created before the gathering transitions
- The group will keep meeting and needs a shared identity to build on
- You need a calm, seated activity to follow the energy of Molecules

RESOURCES NEEDED

Item	Notes
Wristbands (synced)	Groups are pre-assigned by wristband color from the Community Molecules final round. There is no reshuffling needed
Paper (1 sheet per group)	Plain or lined paper will work. Large paper size works well for group display afterward
Pens or markers	One or more writing utensils per group
Flat writing surface	A table where the group can huddle together so everyone can see the paper
Optional: display tape	To post completed biographies on a wall for a gallery-walk debrief before closing
Optional: timer	Keeps the discovery phase on track

HOW TO PLAY

1 **Wristband groups take their seats**

When Community Molecules ends, tell everyone: "Stay with your wristband color group. That will be your group for our next game." Direct each color group to a table.

2 **Introduce the mission**

Tell the group: "Now find out what's actually true about all of you. Every sentence must be unanimously true. If even one person says 'not me,' it doesn't go in."

3 **Discovery phase (10–15 min)**

Groups propose and test statements against every member. Common experiences, values, quirks, preferences all count.

4 **Write the biography (5–10 min)**

Turn the agreed statements into a flowing paragraph. One scribe or one sentence per person in their own handwriting. Name the biography after the wristband color.

5 **Share with the room**

Each color group reads their biography aloud. *Optional* Each group posts their biography on the wall for anyone to read.

ASK THESE QUESTIONS

Use these during the debrief after biographies are shared. Choose 2–3 based on your group's energy and time.

During the activity:

- What surprised you? Was there something you expected everyone to share but didn't, or one you never anticipated?
- Was there anything you wanted to include but couldn't get unanimous agreement on? What did that reveal?

After sharing biographies:

- What's one line from another group's biography that stuck with you?
- If you had to add one more sentence to your group's biography, what would it be?
- What does it mean to have something in common with people you just met?

VARIATIONS

Variation	How It Works
Color Biography	Each group titles their biography after their wristband color and leans into it 'The Red Group is a group that...' The color becomes a team identity.
Cross-Color Mashup	After each color group finishes, the wristbands reassign groups by mixing colors. Each new mixed group writes a second biography. Compare the biographies. What changed when the groups changed?
Speed Biography	Give groups only 5 minutes total. Forces quick instincts over careful negotiation, reveals what people immediately assume they share. Good if time is short after Molecules runs long.
Negative Space	Groups write a biography made only of things that are unanimously NOT true: 'None of us have ever...' Reveals shared absences as meaningfully as shared experiences.
Future Biography	Write a biography of who this wristband color group will be in six months. What do you hope will be unanimously true? Powerful when the group will keep meeting after tonight.
Gallery Walk Close	Post all color-group biographies on a wall before anyone reads theirs aloud. Let the full room read silently, then have each color group claim their biography. A quiet, memorable way to end the wristband experience.

Response Segment

RESPONSE SEGMENT

Group Size	Time	When	Setting
Full Group	10-15 minutes	After Collective Biography	At Collective Biography Tables

WHY USE THIS SEGMENT?

The bios are done and the room is warm. This turns that energy into a simple, low-pressure way for guests to take the next step without having to speak up. The wristband handles it for them.

HOW IT WORKS

1

Facilitator introduces the color switch

"Before you head out tonight, take a moment to choose the wristband color that reflects where you are. If you're hoping to build new relationships, turn your wristband **green**. If you'd prefer to simply be present and observe for now, turn it **blue**. And if you're ready to serve or help others feel connected, turn your wristband **yellow**."

2

Yellow finds green

The facilitator actively directs: "If your wristband is yellow, find someone in the room wearing green, introduce yourself, and take 60 seconds to exchange contact info or use the connection tap feature on the app." Volunteers circulate to assist.

3

Facilitator reinforces roles

While the yellow-green pairs connect, the facilitator adds: "Blue wristbands, you're part of this moment too. There's nothing you need to do tonight, but if you'd like, this is a great time to share your contact information with someone."

COLOR MEANINGS AT A GLANCE

GREEN — Seeking connection: “I want to go deeper. Reach out to me.”

YELLOW — Open to welcoming: “I’m ready to be the one who reaches out.”

BLUE — Prefer to observe: “I’m not ready yet, but I’m here.”

Facilitator Tip — Nobody Gets Left Out

Blue does not mean invisible. As yellow-green pairs connect, make a point to walk the room and acknowledge guests wearing blue by name if you know it, or with a simple ‘Glad you came tonight.’ The color switch closes the event with everyone included.

Next Steps

wavelength

Next Steps

IMMEDIATE FOLLOW-UP

1

Church Staff **Reach out to guests who want to connect**

The app has flagged everyone who indicated they're open to connection. A personal message in the first 48 hours will show genuine interest in connecting with the guest.

→ **Pull the connection list from the app and assign follow-up contacts.**

2

Volunteers **Reach out to the connections you made**

Volunteers were the yellow wristbands, they put their hand up to be the ones who reached out. That commitment doesn't end when the room clears. The guests they connected with are expecting to hear from someone. Be that someone.

→ **Each volunteer should personally message at least one person they connected with tonight.**

3

Facilitator **Set the next date and send it out**

Momentum is the product of the mixer, not just connection. Guests who had a good time tonight will come back, but only if there's something to come back to. Lock in the next event date while the energy is still there and send it through the app so everyone who attended gets the invite directly.

→ **Schedule the next mixer, confirm the date, and push the announcement through the app before the week is out.**

WHAT THE CHURCH RECEIVES AFTER EACH EVENT

What	Details
Guest contact list	Everyone who registered, with name and contact info
Connection requests	A list of guests who indicated on the app that they want to be followed up with
Volunteer connections	A record of which volunteers connected with which guests during the response segment

Troubleshooting

Troubleshooting

BEFORE EVENT	DURING EVENT

WRISTBAND ISSUES

BEFORE EVENT

A wristband won't sync to the app

One or more wristbands are not receiving color assignments after running the sync in the app.

Fix it:

- Confirm Bluetooth is enabled on the facilitator's device
- Move the unsynced wristband within 3 feet of the device and retry the sync
- Power-cycle the wristband: hold the button for 5 seconds until the LED blinks white, then re-sync
- If it still won't sync, set it aside and redistribute. Do not hand out an unsynced wristband

DURING EVENT

A wristband stops working mid-event

A guest's wristband goes dark, freezes on the wrong color, or stops responding during a game.

Fix it:

- Have the volunteer at the door hold 2–3 spare synced wristbands for exactly this situation
- Swap the guest's wristband
- Re-sync the replacement via the app

> *Keep spares pre-synced. A mid-game wristband swap takes under 30 seconds if you're ready for it.*

BEFORE EVENT	**More guests arrive than expected** Attendance exceeds the number of wristbands in your kit, leaving some guests without one. **Fix it:** • Prioritize wristbands for registered guests who arrived first • Pair guests without wristbands with a wristband-wearing guest • For future events, order up one kit size. It's better to have spares than to leave someone out

LATE ARRIVALS

DURING EVENT	**A guest arrives after Frequency has started** The room is already in motion, groups are formed, and a new guest arrives at the door mid-game. **Fix it:** • The door volunteer hands them a wristband and walks them to their color group • If their color group has already finished its prompt, walk them into the nearest active group until they have synced their wristband to the app *Assign the door volunteer before the event starts specifically to manage late arrivals.*

APP & NAMEDROP ISSUES

BEFORE EVENT	**The app won't load the facilitator dashboard** The facilitator enters their code but the dashboard fails to load or shows an error. **Fix it:** • Confirm the device has an active internet connection • Force-close and reopen the app, then re-enter the facilitator code • If the issue persists, use a backup device

DURING EVENT	**NameDrop tap isn't registering** During the Response Segment or exit tap, guests tap wristbands but the connection doesn't save in the app. **Fix it:** • Ensure both guests have the Wavelength app open on their phones during the tap • Tap the wristband directly to the phone's NFC area (typically center-back on most devices) • If NFC is disabled on a guest's phone, use the in-app QR code share as a fallback • Log the connection manually in the facilitator dashboard if needed

Support and Contact Information

Support & Contact

Email support:
wavelengthsupport@gmail.com

For app issues, wristband troubleshooting, account questions, and anything else.

WHAT TO INCLUDE IN YOUR MESSAGE

1	**Your facilitator code** Found on the cover page of this playbook. This lets us pull your account and wristband sync history instantly.
2	**Your event date** Helps us locate the right session data if your issue is related to a specific event.
3	**A short description of the issue** What happened, when it happened, and what you've already tried. Screenshots are always helpful.
4	**Your kit size** Small, Medium, or Large. This helps us narrow down whether the issue is hardware or software.
